Sharing requests for evidence searches between library and knowledge services

To support collaboration between LKS teams, it is now possible for two teams that both serve the same organisation to team up and agree to share search requests from that organisation.

Each LKS should go to their "Edit LKS" page, find the list of organisations they serve, and click "Share Searches" next to the relevant organisation. Having done this, any search request from any member of that organisation will appear in their list of unassigned search requests.

A search can be assigned to staff from either LKS and will be counted for statistic purposes under the LKS team that completes it.

For more details see section [4.12 Sharing Evidence Searches with another library service on page 135 in the KS Handbook](#)

Category Q&A

My member is interested in planning recruitment strategies around the strategic objectives of their Trust.
How do I reflect this in their user profile?

We have added "**Workforce Planning**" in the Professional Interests section.

This activity is undertaken by both individual managers at departmental level, and at Trust board level within service commissioning activities, so we have duplicated the term under the relevant headings (see image).

Combine this term with the relevant setting and the staff discipline of the member.

"You sent me an email earlier from KnowledgeShare... I need to give you feedback that this is AMAZING!

Thank you so much for suggesting I sign up to it. Having just scanned the titles attached, at least 70% are going to be of interest to me. I honestly think, this is going to be a game changer for my academic studies and my role in general."
