Feature reminder: category 'quick links'

Did you know, anyone can view recent resources matching a specific category via a quick link?

For example, www.knowledgeshare.nhs.uk/language or www.knowledgeshare.nhs.uk/evaluating-evidence

This is a great way to demonstrate the type of content people will receive if they sign up for updates. You don't have to be logged in to view these pages, so you can share the links with anyone.

Just select categories from the category tree, and separate multi-word categories with a hyphen.

Q: How many resources are shown?

A: Up to ten resources are shown per page and you can navigate to view further pages. Resources are deleted after 365 days, so no resources older than a year will be included.

Q: Why am I seeing books, etc. from other libraries on this page?

A: As with other sample content, resources that would only be sent to members within certain organisations or regions are currently included. We will be removing these items in a future update.

Home > Evaluating Evidence

Evaluating Evidence

AI for IMPACTS Framework for Evaluating the Long-Term Real-World Impacts of AI-Powered Clinician Tools: Systematic Review and Narrative Synthesis.
Jacob C. Journal of Medical Internet Research 2025;27:e67485.
Published on 17/2/2025
