Managing LKS Staff accounts

LKS Staff accounts are managed differently to Member accounts when it comes to creation and deletion. Your local LKS Administrator(s) have permission to administer Staff accounts for your LKS.

When Staff leave or move to a new team

When Members leave, their accounts are *transferred* to their new LKS or *unassigned*. LKS Staff accounts, on the other hand, must be *deleted*. This ensures that the staff member's activity statistics stay with the LKS they were employed by at the time.

Members for whom they were the Assigned Librarian must be reallocated among the remaining team.

When new Staff join your team

It is important that the LKS Staff format is used so your new team member can administer Member accounts. The button for creating LKS Staff accounts is found under the **Admin** tab (in contrast to Members, which is found under the **Members** tab).
Before creating a new Staff account, check for a previous one if your new team member has held a post in another team. Let us know and we can delete the old account.

For further information on managing LKS staff accounts, please see our [video](#), or refer to p.8-13 of our [LKS Admin handbook](#)

Annual Reports

We now have the annual reports for evidence updates and feedback on evidence searches and skills sessions. We are sending these out to all teams but this is a big job, so if you need your report quickly, please let Ceri know!
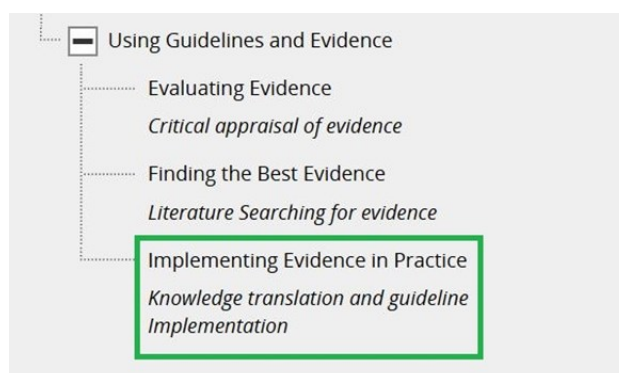

? Our member is interested in bridging the gap between research findings and their application in practice. How can I create a personal interest profile that includes resources on this subject?

A Knowledge Translation as a conceptual framework describes the synthesis, critical appraisal and adaptation of research evidence into clear and actionable recommendations for practice.

We provide a category for this: **Implementing Evidence in Practice**. You will find this in the **Professional Interests** field under **Using Guidelines and Evidence**.

Using Guidelines and Evidence
- Evaluating Evidence
  Critical appraisal of evidence
- Finding the Best Evidence
  Literature Searching for evidence
