Table of contents alerts

Did you know? KnowledgeShare lets you provide regular table of contents alerts (TOCs) to members. Right now, only 4% of members receive TOCs, but there is wide variation across the country, with one team providing them to 59% of their members!

How do I set up TOCs for my members?

TOCs are set up from the Journal Alert section of a member's KnowledgeShare record. Journals can be selected from the drop-down list in the 'Subscribe to Journal' field. Clicking 'Add to List' adds a journal to the list of TOCs members receive from their assigned librarian. Some titles may not be available if they are not currently indexed in PubMed, though we are looking at expanding the options.

When will TOCs be sent? Most TOCs for a member will be sent in a single email on the first weekend following the month of publication. An article published in February will be sent out on the first weekend in March. There may be exceptions, as we are reliant on the date that articles are added to PubMed.

How do I promote TOCs to my members?

We recommend adding an option to your KnowledgeShare sign-up form or library membership form, e.g:

Journal Table of Contents alerts

We can email you when new journal issues are published. List any journal titles you would like to hear about below (please note that some titles may not be available):

For more information, see section 3.6 of the [KnowledgeShare Handbook – Updates](#)

KnowledgeShare

Category Q&A

How should I categorise a member working in the pain management service?

The parent category Pain is available, but for long-term management you may want to exclude Acute Pain and select Chronic Pain. Arthralgia, Neuralgia and Complex Regional Pain Syndromes are also available.

Consider including conditions that cause painful symptoms such as Fibromyalgia, Rheumatoid Arthritis etc.

Combine these with relevant Settings, and the Staff Group categories that match your member's role (for example, Physiotherapist, Occupational Therapist, Anaesthetist, Nurse Specialist, Pharmacist, or Psychologist.)

Age Groups

Adults

Conditions and Lifestyle Factors

Rheumatoid Arthritis, Fibromyalgia, Chronic Pain, Arthralgia, Neuralgia, Complex Regional Pain Syndromes

Settings

Home and Social Settings, Rehabilitation Centres, Outpatient Department

Staff Groups

Physiotherapist

Forthcoming training and events

Evidence Search

This online demonstration will help you manage evidence searching with KnowledgeShare.

Monday 12 December 2022, 10am-12pm
(Teams)

Wednesday 18 January 2023, 10am-12pm
(Teams)

Skills

This online demonstration will help you manage information skills teaching, including either ad hoc teaching or scheduled sessions.

Tuesday 6 December 2022, 2.00pm-4.00pm
(Teams)

Monday 6 February 2022, 10.00am-11.30am
(Teams)

Adding local resources

This online demonstration will show you how to add local events, guidelines and books to your Members' updates.

Friday 13 January 2023, 1.00pm—2.30pm (Teams)
uhsussex.knowledgeshare@nhs.net to book.

"We use KnowledgeShare and find it really valuable for both our team and our colleagues in the trust. We mainly use it as a current awareness service but also have an account set up for our Library Team where we share any public health updates on our blog site. We get lots of positive feedback from staff about this helping to keep them up to date."

Outreach Librarian, Lancashire & South Cumbria NHS Foundation Trust
