## [A: Accessing ProQuest Databases and Creating a Personal Account](#)

### 1. Accessing ProQuest Databases

- Go to the Proquest website: <https://www.proquest.com>
- Select 'Log in through your library':

- Select 'Sussex Partnership NHS Trust' as your institution:

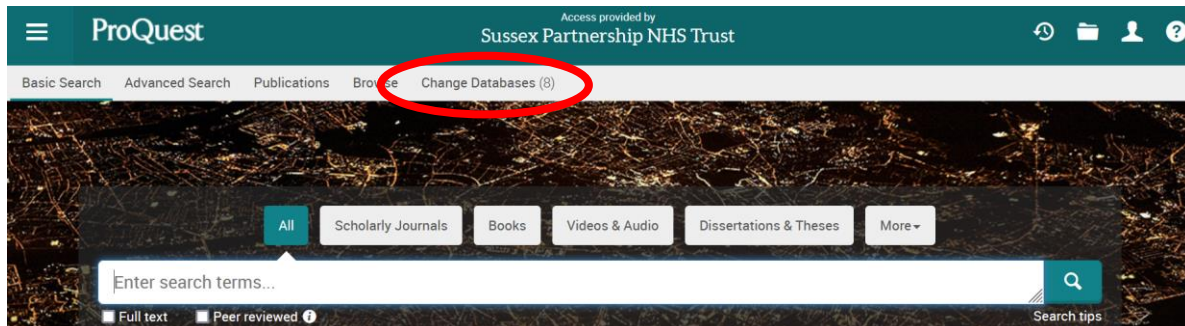

- Sign in using your **OpenAthens** account.

This will take you to the **ProQuest** front page or to the '**Select Databases**' screen (in which case jump to step 3)

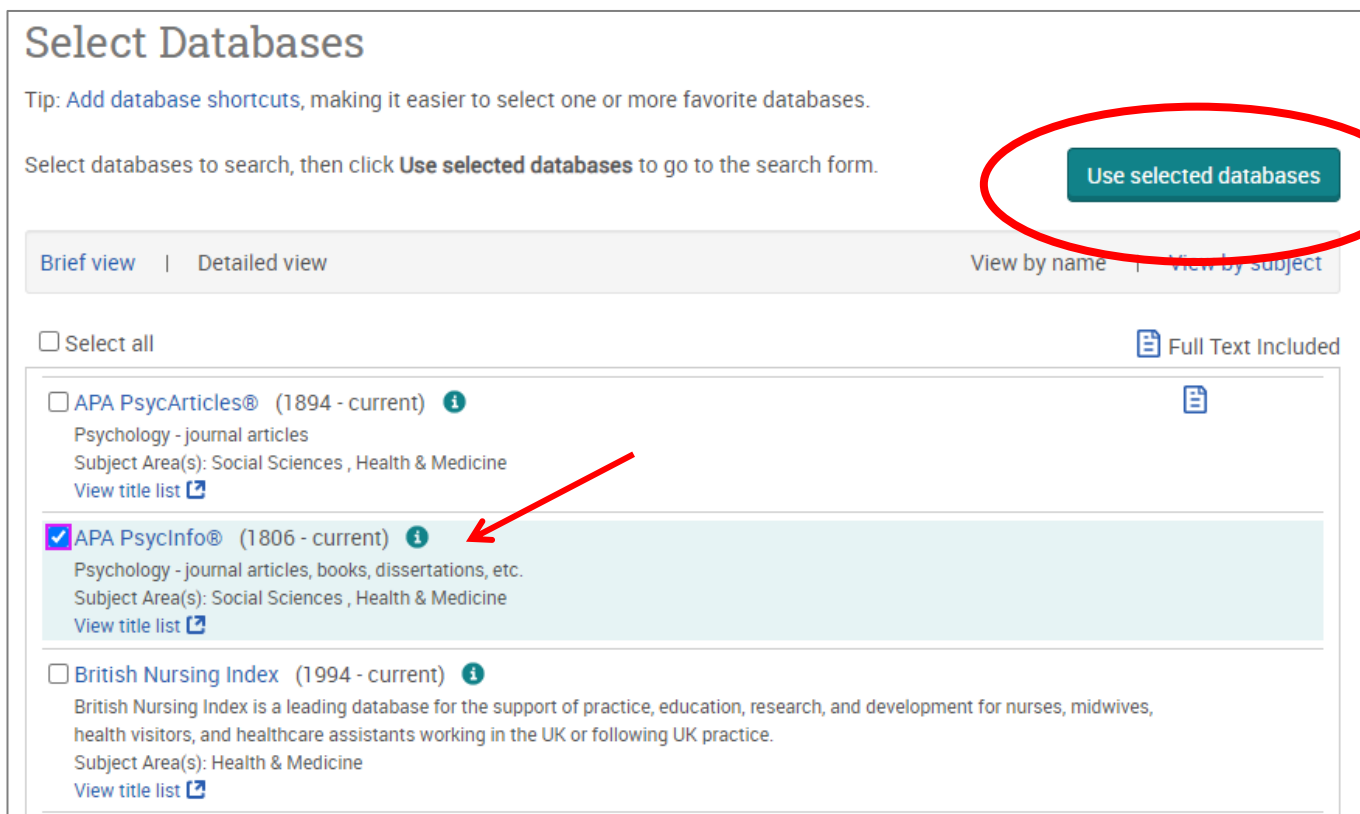

# Literature searching using Proquest

2. From the menu across the top, you can choose the database you would like to search by clicking on **'Change Databases'**:

3. Select the database you want to search, for instance **PsycINFO**. Then click **'Use selected databases'**. *We recommend searching one database at a time:*

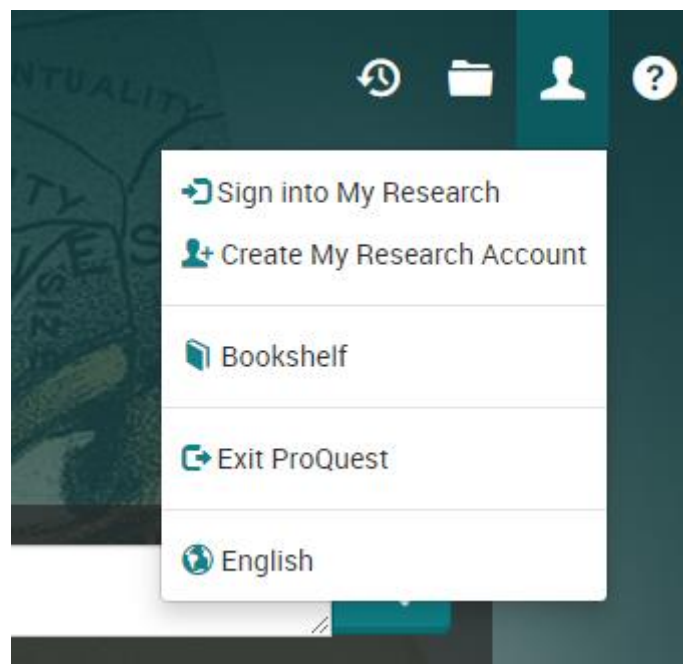

# Literature searching using Proquest

4. Once you have selected a database, you can begin searching. However, you will first need to **create a personal/research account to save your searches and results**. If you already have a personal account, login to it now.

Click on the person icon in the top right corner:

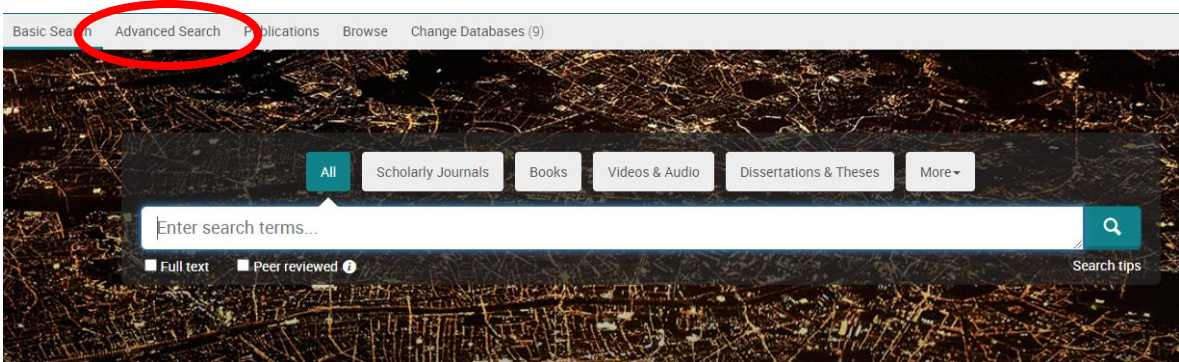

5. From here, either **sign into your existing Research Account**, or select **‘Create My Research Account’**:

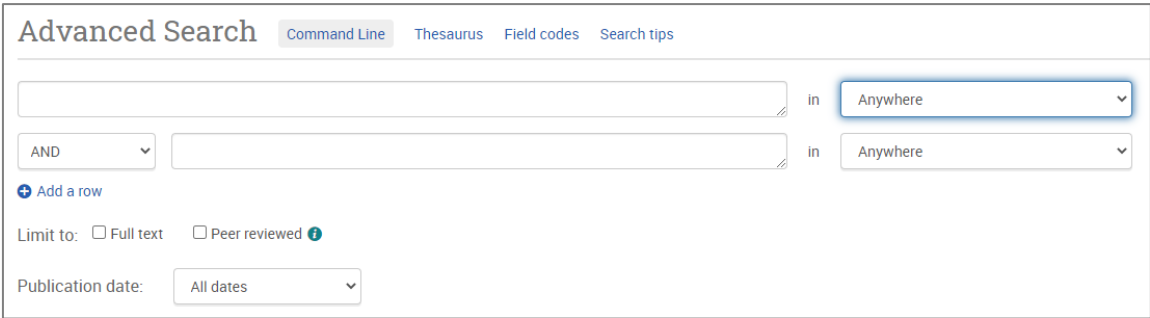

# Literature searching using Proquest

## B: Searching for Terms

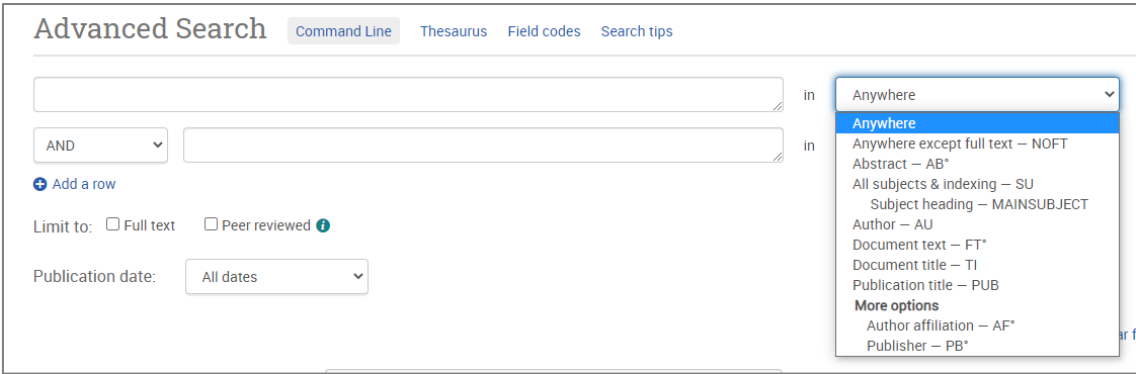

6. To start a search, click on 'Advanced Search':

You can now start entering your search terms in the fields:

7. To select which fields you would like to search, use the drop-down menus. You can choose to search anywhere in an item's record, or narrow your search down to specific fields:

# Literature searching using Proquest

8. If you want to search more than one specific field, for example, Title and Abstract, you need to search for these on separate rows using 'OR'. **Once you've entered your search term, select 'Search':**

9. This will take you to the results page. **To see your current search, click on 'Recent searches':**

This will show you your search strategy so far.

10. To search further, click on 'Modify search':

**Repeat steps 7-10 for all keywords.**

# Literature searching using Proquest

## C: Searching for Subject Headings

11. To search for Subject Headings, select 'Thesaurus' from the menu bar. *Make sure to clear the search fields of previous keyword searches:*

12. Type in the subject headings you want to search for and click 'Find':

13. The Thesaurus may have exactly what you're looking for, or offer suggestions to other subjects – have a go at searching for alternative terms too. **Click on the relevant heading if there is one:**

# Literature searching using Proquest

14. Tick the term(s) you want to use and click on 'Add to search'. The Thesaurus will suggest broader and narrower terms, which you can also select, or **click on the notes icon to find out more about each term**:

**Search terms:**

Contains word(s)  
 Begins with (enter at least 2 characters)

**Browse terms:**  0-9 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Combine using:  
 OR  AND  NOT

# Literature searching using Proquest

15. This will add the subject heading to the search field. Click 'Search' to search for the subject heading:

The screenshot shows a search interface with a search field containing the text "MAINSUBJECT.EXACT("Passive Smoking")". Below the search field, there are options for "AND" and "Add a row". There are also checkboxes for "Peer reviewed" and "Impact statements", and a "Publication date" dropdown set to "All dates". A "Search" button is circled in red in the bottom right corner.

Repeat steps 11-15 for all subject headings.

## D: Combining Search Terms and Subject Headings

Head back to your 'Recent searches' to combine your search terms.

16. Combine your terms and subject headings by typing OR between the line numbers you want to combine (without the preceding 'S') E.g., 1 OR 2 OR 3. Then click 'Search':

The screenshot shows the 'Recent Searches' page. The search bar contains the text "1 OR 2 OR 3". Below the search bar, there are examples of search queries: "1 AND 3 or \*6\*", "1 AND 3 OR 1 AND 2", and "3 NOT treatment". A "Search" button is circled in red. Below the search bar, there is a table of search results with columns for 'Set', 'Search', 'Databases', 'Results', and 'Actions'.

Set	Search	Databases	Results	Actions
S3	MAINSUBJECT.EXACT("Passive Smoking")	APA PsycInfo®	923	Actions ▼
S2	ti("secondhand smok*" OR "second hand smok*") OR ab("secondhand smok*" OR "second hand smok*")	APA PsycInfo®	1,181	Actions ▼
S1	ti("passive smok*" OR ab("passive smok*")	APA PsycInfo®	363	Actions ▼

# Literature searching using Proquest

Head back to 'Recent searches' to view your strategy so far, including the results for the first concept (Line 4 in the example below):

<input type="checkbox"/>	Set ▾	Search	Databases	Results	Actions
<input type="checkbox"/>	S4	(ti("passive smok*") OR ab("passive smok*")) OR (ti("secondhand smok*" OR "second hand smok*") OR ab("secondhand smok*" OR "second hand smok*")) OR MAINSUBJECT.EXACT("Passive Smoking")	APA PsycInfo®	1,778	Actions ▾
<input type="checkbox"/>	S3	MAINSUBJECT.EXACT("Passive Smoking")	APA PsycInfo®	923	Actions ▾
<input type="checkbox"/>	S2	ti("secondhand smok*" OR "second hand smok*") OR ab("secondhand smok*" OR "second hand smok*")	APA PsycInfo®	1,181	Actions ▾
<input type="checkbox"/>	S1	ti("passive smok*") OR ab("passive smok*")	APA PsycInfo®	363	Actions ▾

Repeat steps 7-16 to search for the rest of your concepts.

17. Once you have searched all your concepts, combine them using 'AND' and click 'Search'. In the below example, line 4 combines the results for one concept (passive smoking) and line 9 for the second concept (cancer):

## E: Filtering and Saving Results

18. On the results page, you can filter down your results by publication date, language, gender etc. on the left-hand side options bar:

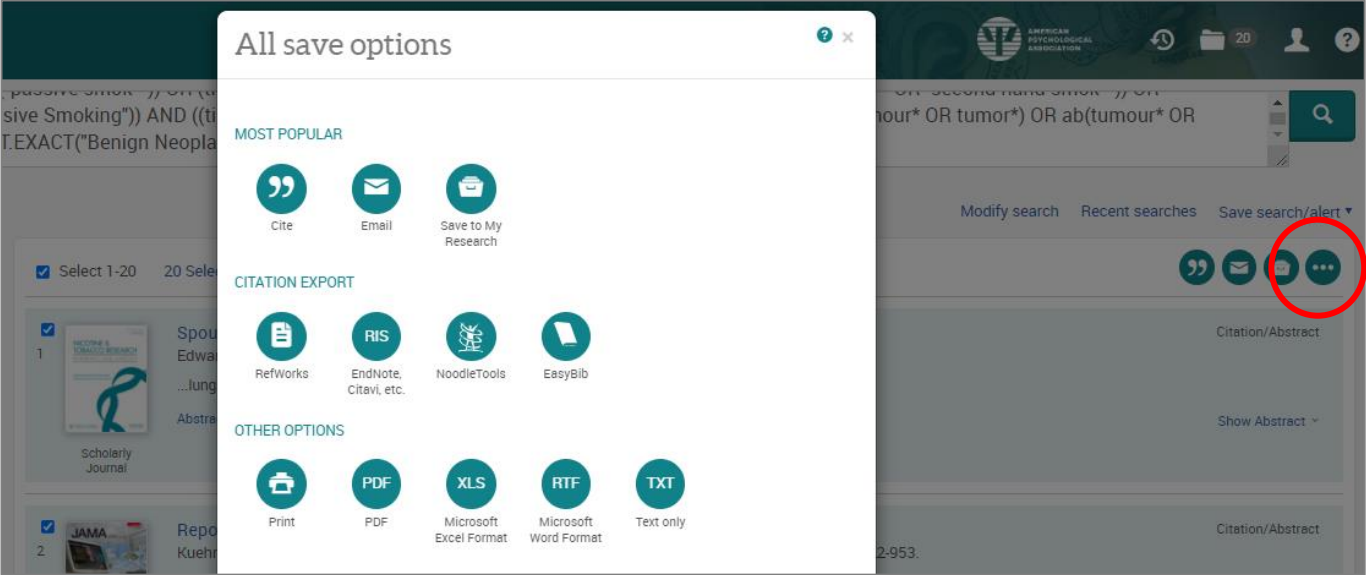

19. You can save individual results by ticking their selection box and clicking the 'Save to My Research' icon. These results will now be saved in your 'My Research' folder:

# Literature searching using Proquest

20. To export results, select the results you would like to export and click on the 3 dots to view all save options.

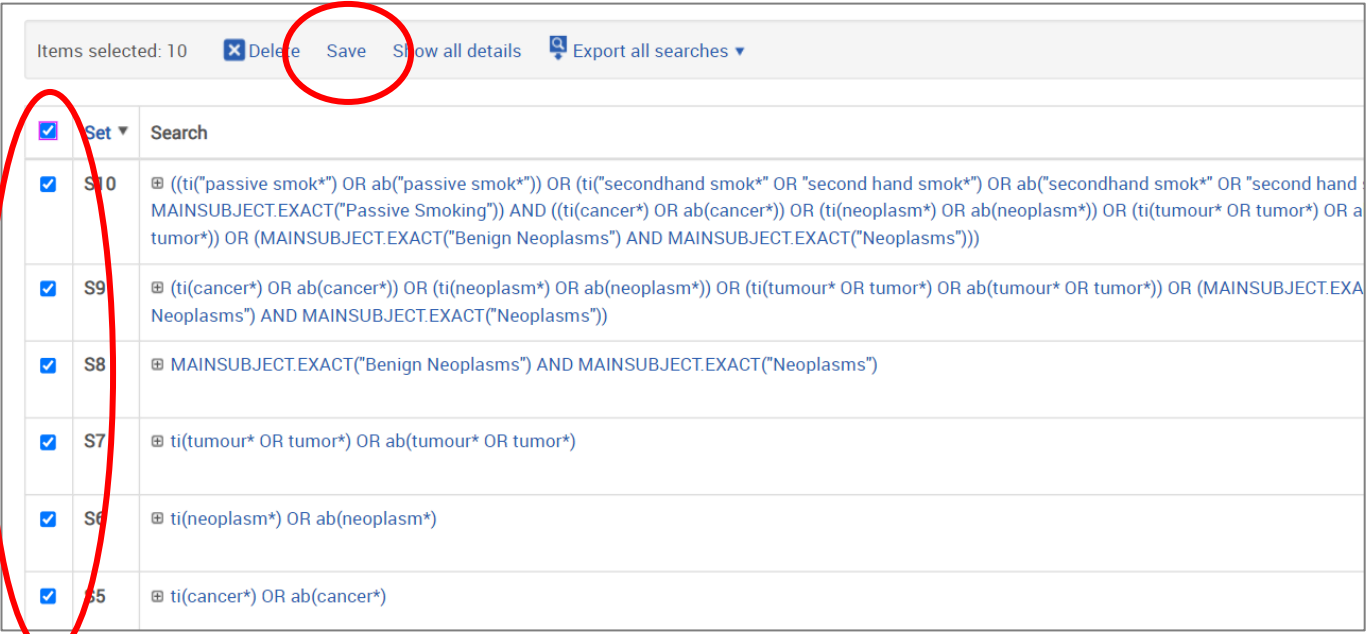

From here you can save your results in your Research Folder, send them via email, export to reference management software or save them as PDF:

As well as saving the results, **we highly recommend saving your search.**

21. To view your search, head back to your 'Recent searches'.

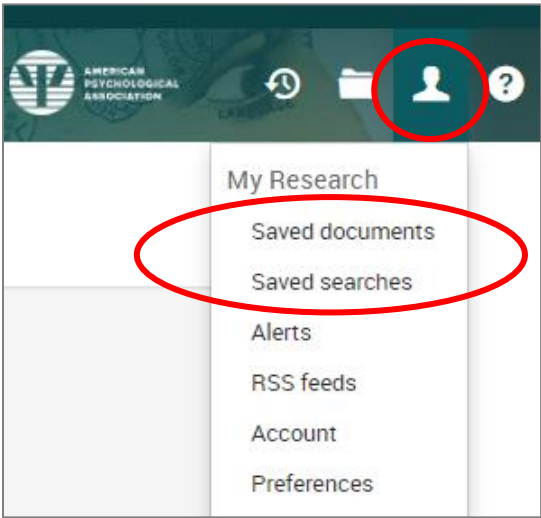

22. Select the search lines and click 'Save':

# Literature searching using Proquest

23. Give your search strategy a name and add comments if you wish. Click 'Save':

24. You can access your saved searches and saved results from your account menu:
