What complications should I look out for?

Pain

Let the nurses know if you need PRN pain relief.

Constipation

This can occur due to reduce mobility and side effect from medication. We encourage you to increase fluid intake and eat high fibre diet.

Chest infection

Prioritize deep breathing and coughing exercises, mobilize early by sitting up and walking as soon as possible.

What do I need to know about my discharge?

Before discharge, please consider the following:

- Are you aware of the expected length of stay?
- Have you planned help at home?
- Have you arranged transport home?
- Please note that Hospital transport may not be readily available.

On the day of discharge:

- You may be asked to wait in the discharge lounge to be collected
- We will aim for discharge to take place before lunch time.
