Category Q&A

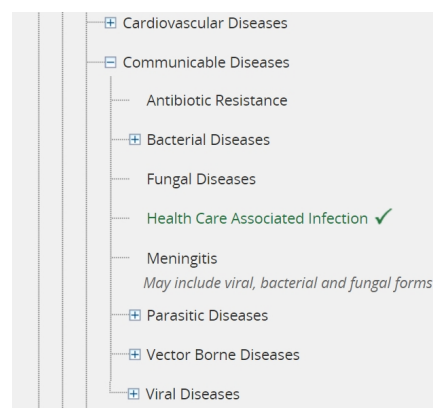

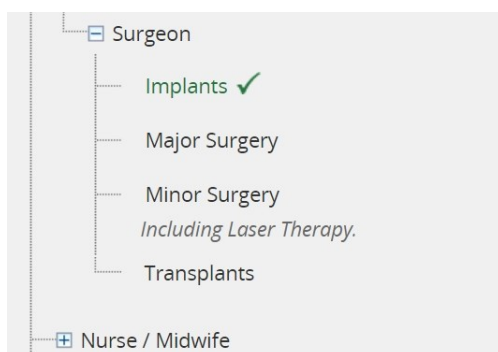

I have a member with the following interests: prosthetics, joints, infections. How do I combine these?

This kind of question, which comes up regularly, concerns surgical site infections (SSIs) for patients undergoing prosthetic limb implants.

The answer is to combine **Health Care Associated Infections** in **Communicable Diseases** with **Implants** under the **Surgeon** user group.

If categorising resources, don't forget to add other staff groups who may be interested.

Interested in evaluating the impact of your evidence updates?

We have developed a standard impact questionnaire and successfully piloted with our local members earlier this year.

You are welcome to use and adapt the questions from the questionnaire in your own surveys. A Word version can be downloaded from our support site:

[Appendix 10 – Evidence Updates Impact Form](#)

We hope to host this centrally as an online form in future that all of our KLS teams can use. We would provide a survey link for you to share with your members when you want to run a local evaluation.

Copies of this year's Sussex Health evaluation report can be provided on request.

New developments

Our newsletter is available for all your team members. If you think any colleagues would benefit from receiving it each month, let Ceri know and she'll make it happen!
